# DRYWALL

## METAL PROFILES

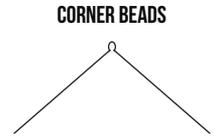

STUDS, TRACKS & CORNER BEADS

STUDS

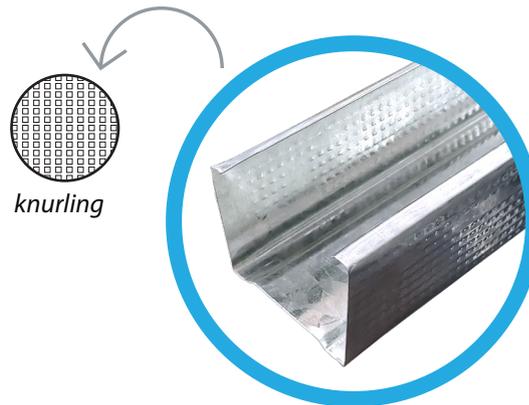

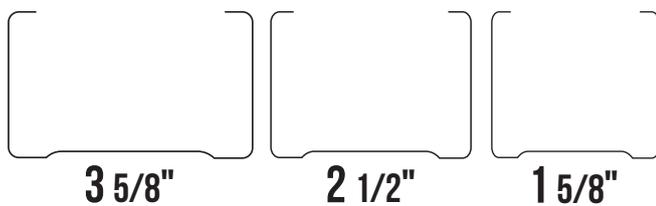

TRACKS

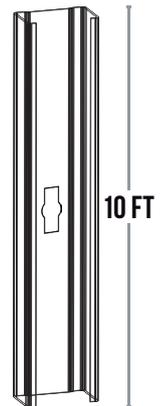

CORNER BEADS

"Studs and tracks manufactured with galvanized steel for the construction of walls and ceilings with lightened plates (sheetrock, fibercement, wood, among others). The Perforations in the studs body facilitate the passage of wires or pipe lines and grooved in the wings to facilitate the placement of the screws, the dimensions of the tracks guarantee a perfect union between this and the stud".

### Studs - Available sizes

### Dimensions

1 1/4" x 1 1/4" | Length: 10'

It is made of an excellent material to make it more resistant and durable, since the main objective of galvanized steel is to prevent oxidation and corrosion that humidity and environmental contamination can cause on iron. This product is ideal for partitions, walls, ceilings, mezzanines and facades.

**Observation:** Other lengths possible on request.

with the best quality of the market.

# MODULAR FACTORY

KITCHENS, CLOSETS & FURNITURE

*Customized designs adapted to the specific needs of the client*

*High-tech equipment that guarantees an optimal finish*

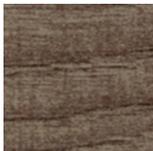

*Manageable delivery times according to customer needs*

*Adequate raw material stock to respond to high-volume orders*
